Brief Industrial Profile of Sangli District

1) General Characteristics of the District:

There are several interesting stories as to how the name Sangli originated. One of them is that, there were six (6) Gallies i.e. lanes on the bank of the Krishna River hence the name “SANGLI”. The second one is that, the name of the village was Sangalki in Kannad language so in Marathi it became Sangli. Another belief is that the confluence of Warna and Krishna rivers is near Sangli village. The word of confluence in Marathi is ‘Sangam’ and the Sangli is distorted version of the word Sangam.

Sangli is among the largest grape producing districts in India and houses a large wholesale grape market. The industrial town of Kirloskarwadi is also situated in Sangli District. Industrialist Laxmanrao Kirloskar started his first factory at this place. Kirloskarwadi is one of the most beautiful industrial towns in India.

4. Existing Clusters of Micro & Small Enterprises:

4.1 Details of Major Clusters:

4.1.1 Manufacturing Sector:

1. Raisin Making Cluster
2. Textile Cluster
3. Turmeric Cluster

4.2 Details of Clusters identified and selected under MSE-CDP:

4.2.1 Name of the Cluster: Raisin Making Cluster, Miraj, Sangli

1	Principal Products Manufactured in the Cluster	Grape processing i.e. end product Raisin.
2	Name of the SPV / Association/NGO	M/s. Sangli Grape Processing Marketing & Research Industries, Ltd., Plot No. 22A, Subhashnagar, Kabade Bldg., Tal. Miraj, Dist. Sangli. Shri Baburao Anna Kabade, Chairman Phone-0233-2267474, M-9822598160 Email: sanglirisin@gmail.com
3	No. of functional units in the cluster	138
4	Turnover of the Clusters	Rs. 150/- crores
5	Value of Exports from the clusters	Rs. 80/- crores
6	Employment in Cluster	2000 Nos.
7	Average investment in plant & Machinery	Rs. 15 lakhs
8	Major issues/requirement	Present Raisin making process is through conventional & unhygienic method, De-steaming, Grading & sorting processes are done manually which are costly and time consuming. Globally there is good demand for Raisins produced in Sangli cluster, but since the product is not certified as per the codex standard direct export is not possible, Lack of Automatic packaging facility for Raisin. Presently packed in bulk form.
9	Presence of capable institutions to be associated	<ol style="list-style-type: none"> 1) National Research Centre for grapes, Pune. 2) Central Food Technological Research Institute, Mysore. 3) Maharashtra Grape Growers Association, 4) Agricultural Colleges and Technical Institutions, Engineering and Management Institutes.

10	Thrust Areas	Trust building amongst cluster actors, capacity building of the enterprises, technology upgradation, international exposure with respect to the present international standards.
11	Problems & Constraints	<ul style="list-style-type: none"> • Lack of facilities for manufacturing of Hygienic Raisins. Due to open to sky i.e. open drying of the grapes produced would lead to more wastage and unhygienic raw material to produce raisins. • Limitation for segregating Raisins based on size & colour. • Non availability of Testing Facilities to carry out analysis of contents of Raisins produced. • Facilities for Export Quality Packaging is not available. • Non assured quality restricts scope for Direct Exports in value chain. • Failed to establish as recognized location specific brand i.e. Sangli Raisin.

4.2.2 Name of the Cluster: Textile Cluster, Vita, Dist. Sangli

1	Principal Products Manufactured in the Cluster	Textile & Garment
2	Name of the SPV / Association/NGO	M/s. Lucky Lark Integrated Textiles and Garment Hightech Cluster Welfare, A/Post Gardi, Tal. Khanapur, Dist. Sangli. Mrs. Shalan Jotiram Mali Mo. No. 9673007235
3	No. of functional units in the cluster	Units – 50
4	Turnover of the Clusters	Rs. 1600 lakhs
5	Value of Exports from the clusters	50% of the total turnover will export after completion of the cluster
6	Employment in Cluster	1000 Nos.
7	Average investment in plant & Machinery	Rs. 19.68 lakhs
8	Major issues/requirement	<ul style="list-style-type: none"> • Cluster is located in Rural area. • Weaving units are availing required day to day facilities like Sizing, Testing of Yarn & Fabric from Ichalkaranji. (about 85 km.) • Affects the production schedule as well as business economics of the cluster units.

9	Presence of capable institutions to be associated	<p>1) Dattajirao Kadam Technical Institute, Ichalkarnji , Dist. Kolhapur</p> <p>2) Walchand Engineering Collage, Sangli</p>
10	Thrust Areas	Trust building amongst cluster actors, capacity building of the enterprises, technology upgradation, international exposure with respect to the present international standards.
11	Problems & constraints.	<ul style="list-style-type: none"> • Proper sizing of yarn is very much required for quality manufacturing of fabric. • Through sampling centre garment units can develop various patterns & designs • Auto cutting facility will help for uniform bulk cutting of fabric and reduce fabric waste. • Facilities of laundry & auto pressing would save time and manufacturing cost of cluster units • Considering the cost for establishing these facilities is not affordable economically for single micro enterprise in the cluster. • To address the issues and concerns, creation of State of Art CFC consisting facilities of common sizing, auto cutting, sampling washing, auto pressing with common product testing laboratory are necessary. (Common Facility Centre created under MSE-CDP has been providing services to cluster beneficiaries for various requirement/need based services)

4.2.3 Name of the Cluster: Turmeric Cluster, Sangli

1	Principal Products Manufactured in the Cluster	Turmeric Processing, Turmeric Powder

5	Value of Exports from the clusters	Indirect export
6	Employment in Cluster	900 Nos.

7	Average investment in plant & Machinery	Rs. 5.00 lakhs
8	Major issues/requirement	<ul style="list-style-type: none"> • Improper sun drying method adopted since ancient time. • Open drying & non conducive situation invite insect attack spoiling quantity (wt) & quality. • Due to open to sky method adopted (i.e. Sun drying) throughout the day & change in climatic condition in night time causes accumulation of moisture making turmeric fingers hardened resulting in deterioration of colour & quality. • Unhygienic way of drying leads to prohibit & minimize the chances to meet international standards.
9	Presence of capable institutions to be associated	<ol style="list-style-type: none"> 1) Collage of agriculture, Pune/ Kolhapur 2) Agriculture technology information center 3) Krishi Vigyan Kendra 4) Halad Sanshodhan Kendra, Sangli 5) NABARD 6) Dept. of Agriculture
10	Thrust Areas	Trust building amongst cluster actors, capacity building of the enterprises, technology upgradation, international exposure with respect to the present international standards.
11	Problems & constraints.	<ul style="list-style-type: none"> • Non availability of testing facilities to carry out analysis of the contents of turmeric produced. • Lack of R&D at every intermediate stage of value chain. • Lack of awareness & facilities of export quality packaging. • Polishing processes involve mild steel make machines which lead to ferrous impurities in finished products violating the international norms. • Lack of facilities to manufacture value added products restricts exploitation in prominent sector like Health & Pharma, Cosmetic, Food, Dyes etc. • Fail to establish as a recognized location specific brand i.e. Sangli Turmeric.
